# The Priestly Order

The Qumran calendars were reckoned not only by months, but also by the rotation of the priestly courses (mishmarot).

The courses would come into Jerusalem for service at the temple for one week, then rotate out as the next group arrived to serve. Qumran texts relied upon this 'eternal cycle' not only for their calendar, but also for their chronology and history. Every Sabbath, month, year and feast bore the name of a priestly family.

The priestly rotation required six years before the same group would be serving once again in the same week of the year. This sexennial cycle reflects the need to synchronize the solar calendar with the lunisolar version. Since the priestly calendar totaled 364 days to the year, while the lunisolar calendar alternated months of 29 and 30 days, the lunisolar calendar would 'fall behind' by ten days per year. After three years, however, the lunisolar calendar was intercalated with an additional 29 or 30 days, bringing the two versions once again into harmony (364 X 3 = 354 X 3 + 30).

Two such cycles fit perfectly with the six years needed for one complete priestly cycle. The order of the priestly courses was originally determined by lot, and is laid out in **1 Chr. 24:7-18** as follows:

- 1 - Yehoyarid
- 2 - Yedayah
- 3 - Harim
- 4 - Se'orim
- 5 - Malkiyah
- 6 - Miyamin
- 7 - Haqqots
- 8 - Abiyah

Priest's Name

The Qumran calendars refer to the same names, but it varies the order by beginning the cycle with Gamul instead of Yehoyarid. Apparently the reason for this change is that the list as given in 1 Chronicles began the rotation with Yehoyarid in the autumn.

The Qumran cycle aligns with the God ordained year which begins on Abib 1 in March/April, coinciding around the time of the vernal New Year.

The Creation happened in the spring; thus an eternal order based on the Creation must of necessity begin at that time. Observing the vernal New Year meant that the priestly cycle would begin with Gamul.

*The Modern Jewish names were only adopted after their return from Babylon, The references found in the book of Ester are not referenced here as the story contained in the book of Ester can be easily discredited and determined historically inaccurate. It is even rejected by the Jewish Encyclopedia as being fictitious in nature. Ester is also the only book in the canonized Hebrew Tanakh that was not found in the Dead Sea Scrolls*

## History

In 167 BCE, King Antiochus returned to Jerusalem after his second campaign in Egypt, and he immediately banned the Hebrew religion and the Zadok Priestly Calendar, and prohibited all religious practices. He dedicated the Temple in Jerusalem to Zeus, the Lord of Heaven (Baal Shamen), and ordered the Hebrew people to worship Zeus and to participate in the festival honoring Dionysus, who was Zeus' son, (who was called Bacchus by the Romans), and Dionysus/Bacchus was known as the "dying and rising god" as he was "twice born." This festival, called Bacchanalia, was held on March 16th and March 17th to pollute the Hebrew Spring Equinox Day and New Year's Day. When King Antiochus began sacrificing swine and making abominable offerings in the Temple, this began the Maccabean revolt (1 Maccabees Chapter 1, and 2 Maccabees Chapters 4, 6 and 7)

After the death of King Antiochus, in 164 BCE, some of the Hebrew priests tried to restore the priestly Calendar, but the Greek New Moon influence was all around them. Later, in 359 CE, Hillel II introduced the fixed calculated New Moon Calendar that is based on the conjunction of the moon, and it is the Lunar Calendar that has been used by Jews and others to this day to determine the 1st Day of the Months and the Annual Feast Days profaning the Mo'edim or set apart days.

## Genesis 1:14

(14) And Elohim said, "Let lights come to be in the expanse of the heavens to separate the day from the night, and let them be for signs and appointed times, and for days and years,

## The Layout of the Zadok Calendar

The calendar is comprised of 364 days divided into twelve months with thirty days each. In four of those months, the 3rd, 6th, 9th and 12th months there is an additional intercalary day or a 31st day added at the end of the month marking the changes of the seasons. The following day, the 1st day of the 1st, 4th, 7th, and 10th months are called days of remembrance, and some consider them to be special mo'edim and believe they are to be kept as sabbaths.

**Leviticus 23:2**  
 (2) "Speak to the children of Yisra'el, and say to them, 'The appointed times of יהוה', which you are to proclaim as set-apart gatherings are..."

There are 10 appointed times or mo'edim on the Zadok calendar

1. Passover - April 2nd
2. Unleavened bread - April 3rd thru 9th - High Sabbath on April 3rd & 9th
3. First Fruits of Barley - First Fruits - April 14th
4. First Fruits of Wheat - Shavuot - Pentecost - June 2nd - High Sabbath
5. First Fruits of Wine - July 21st
6. First Fruits of Oil - Sept 8th
7. Yom Teruah - Trumpets - Sept 18th - High Sabbath
8. Yom Kippur - Atonement - Sept 27th - High Sabbath
9. Sukkot - Tabernacles - Oct 2nd thru 8th - High Sabbath on Oct 2th
10. The 8th Day - Oct 9th - High Sabbath

Seven of these mo'edim are considered high sabbaths indicated above. The first and last day of Unleavened Bread, Shavuot, Yom Teruah, Yom Kippur, The first day of Sukkot, and the final 8th day.

The year always begins on the 4th day of the week being Wednesday on our modern Gregorian calendars. Once the beginning of the year has been established the pattern never changes following a 30, 30, 31 day pattern as shown to the left.

The Dead Sea Scrolls tell us the day of the week and month for every Shabbat and Mo'ed (multiple times in many cases) proving that the mo'edim and shabbats are on the same day of the week and month every year, leaving the seven day weekly cycle absolutely unbroken.

The Zadok Calendar is also the only calendar that can show true chronology with scripture. Given enough data and dates in an account, it can be matched perfectly to the Zadok calendar in both the Hebrew and Greek texts. No other calendar presented as "Biblical" can claim to do that.

## Chodesh vs "New Moon"

In scripture there is no command to search the moon to begin our months. In fact the term "new moon" doesn't even exist in the Hebrew Bible. The word for "Moon" in Hebrew is יָרֵחַ (yareach). However the word שִׁבְעָתִי (chodesh) which is translated as "new moon" generally only when its associated with the feasts, simply means renewing. Yet we never see the two together as (yareach chodesh). The Greek LXX which predates the Hebrew Masoretic by nearly 13 centuries was the prominent version available during the first century BC when those in Qumran, also known as Bethabara were penning the Dead Sea Scrolls.

In the LXX the first Greek word we see translated as "new moon" is found in 1 Sam 20:5 and it is the same one used in Colossians by Paul. That word is νομήνια (noumenia) which is a compound of two Greek words νέος (neos) meaning new, and μήν (men) meaning month. The Greek word μήν (Men) is NEVER used as "moon" in the Greek. In fact the Greek word for moon is σελήνη (selene) and it is also NEVER associated with the beginning of a new month. So, the equivalent Hebrew term "Chodesh" definitely doesn't relate to the moon in any way. Its a horrible application of a much later rabbinic tradition that has been placed upon the modern english translations that we have available today.
